

## **“Plantation Drive and Campus Cleaning Programme” on 09.10.2021**

On the 9th of October 2021, the Eco Club, in collaboration with the Department of Botany, orchestrated a Plantation Drive and Campus Cleaning Programme. The programme was organized under the scheme “Azadi ka Amrit Mahotsav,” supported by Ministry of Environment Forest & Climate Change, Govt. of India, and Assam Science Technology & Environment Council (ASTECC), Govt. of Assam.

The event aimed to foster environmental awareness, encourage sustainability, and enhance the aesthetic appeal of our campus. Under the guidance of botanists, participants, comprising students of Botany and faculty members actively engaged in the planting process, employing proper techniques to ensure the saplings' survival and growth. Each planted tree represented a tangible contribution to carbon sequestration, air purification, and habitat restoration.

Following the Plantation Drive, attention turned to the Campus Cleaning Programme, reflecting our holistic approach to environmental stewardship. Equipped with necessary tools and protective gear, students dispersed across the campus, addressing areas prone to litter accumulation and environmental degradation. The collaborative effort exemplified the collective responsibility towards maintaining a clean and sustainable campus.
