

Educational Trip of 5th Semester (Honours) to Daffodil Nursery, Khetri on 30/12/2021

An educational trip was organized for the 5th-semester (Honours) students to Daffodil Nursery, located in Khetri, on the 30th of December, 2021. The purpose of the trip was to provide students with practical exposure to horticulture, nursery management, and environmental conservation, thereby complementing their academic learning with real-world experiences.

Upon arrival at Daffodil Nursery, students were greeted by the staff and given a guided tour of the facilities. They had the opportunity to observe various stages of plant propagation, from seedling production to grafting and potting, gaining insights into the nursery's operations. Under the guidance of nursery staff, students learned about the importance of soil preparation, watering techniques, and pest management practices in maintaining healthy plants. This trip provided valuable opportunity to bridge the gap between theory and practice in horticulture.
