

Wall Magazine Inauguration on 20/10/2022

On 20th October 2022, the Department of Botany inaugurated a wall magazine dedicated to the theme of “Algal World.” The event aimed to raise awareness about the importance of algae in various ecosystems, their ecological significance, and their potential applications in fields such as biotechnology, environmental remediation, and food production.

The inauguration ceremony commenced with an introduction to the significance of algae by Ms. Hunmily Teronpi (Assistant Professor, Department of Botany, North Gauhati College), highlighting their role as primary producers in aquatic ecosystems and their diverse morphological and physiological adaptations. The ceremony was attended by students, faculty members, and invited guests.

By showcasing the beauty, diversity, and importance of algae, the magazine serves as a catalyst for curiosity, inquiry, and dialogue on environmental sustainability and biotechnological innovation.
