

Parent-Teacher Meet on 28th November 2024

The Department of Botany organized a Parent-Teacher Meet on 28th November 2024 with the objective of strengthening the academic support system through constructive interaction between parents and faculty members. The programme commenced at 11:00 AM in the departmental seminar hall and saw active participation from a number of parents and guardians of students from various semesters.

The meeting began with a welcome address by Dr. Ruby Doley, Head of the Department, who briefed the parents about the curriculum structure, academic calendar, and the department's initiatives for holistic student development. This was followed by presentations from faculty members who shared insights into students' academic performance, attendance, discipline, and involvement in co-curricular activities.

Parents were also introduced to the new FYUGP (Four Year Undergraduate Programme) framework and were informed about its significance in shaping students' academic and career prospects. The faculty emphasized the importance of regular communication between the department and parents for monitoring student progress and addressing academic challenges in a timely manner.

An open discussion session was held where parents shared their views, raised concerns, and provided valuable feedback. They appreciated the department's efforts in maintaining academic standards, organizing skill-based programmes, and offering a supportive learning environment.

The meeting concluded with a vote of thanks delivered by Dr. Ipsita Bhattacharjee, expressing gratitude to all parents for their presence and for their role in supporting their children's education. Light refreshments were served at the end of the programme.

The Parent-Teacher Meet proved to be a fruitful platform for fostering collaboration between the institution and families in working together toward the overall development of the students.
