## BOTANY

(Honours Core)

Paper: BOT-HC-6026

(Plant Biotechnology)

Full Marks: 60

Time: Three hours

The figures in the margin indicate full marks for the questions.

· Pill	in the blanks: $1 \times 7 = 7$
(a)	discovered totipotency.
(b)	A single strand of nucleic acid tagged with a radioactive molecule is called a
(c)	The element provides a very stable ultra-low temperature environment.

Contd.

- is a type of hybrid that contains a lambda phage cos sequence.
- (e) A \_\_\_\_\_ is a collection of DNA fragments that have been cloned into vectors.
- (f) The basic target of \_\_\_\_\_ is a living cell.
- (g) \_\_\_\_ genes are used to track the physical location of a segment of DNA.
- Answer the following questions very briefly: 2×4=8
  - (a) What are cloning vectors?
  - (b) What is the principle of totipotency?
  - (c) What are the applications of somatic embryogenesis in plant tissue culture?
  - (d) Mention the types and uses of microinjection.
- 3. Answer any three of the following: 5×3=15
  - (a) What do you mean by colony hybridization? Mention its practical applications.

- (b) Write a note on industrial enzymes.
- (c) Where is linear DNA found? What are the advantages of linear DNA over circular DNA?
- (d) What is the difference between androgenesis and gynogenesis? What do you mean by direct androgenesis?
- (e) Write a note on Ti plasmid.
- 4. Answer **any three** of the following: 10×3=30
  - (a) Write about various types of reporter genes with their applications.
  - (b) What do you mean by primary and secondary metabolites? How can biotechnological approaches enhance the production of secondary metabolites?
  - (c) Give an account on transgenic crops with improved quality traits.
  - (d) What are restriction enzymes? Mention the specific properties of various types of restriction enzymes, alongwith their importance for recombinant DNA technology.

3 (Sem-6/CBCS) BOT HC 2/G

Contd.

- (e) Differentiate between genomic DNA and cDNA libraries. Discuss about the construction of genomic library.
- (f) Discuss eleborately various steps involved in plant tissue culture.

androgenesis and gynogenesis? Word do you mean by direct androgenesis?

Write, a nore on Ti plasmid.

Answer cary three of the following: 10×3-30

(a) Write about various types of reporter genes with their applications.

b) What do you meen by primary and secondary metabolites? How can biotechaological approaches enhance the promucion of accordary metabolites?

(d) Give an account on transgenic crops with improved quality traits.

What are restriction chapseds? Mention and opening properties of various types of respiction ensymes, alongwith their importance for cucombinance DNA becombinance.
