

REPORT

EVENT: EXPOSURE VISIT TO PREINCUBATION CENTER

PLACE OF VISIT: GUWAHATI BIOTECH PARK, GUWAHATI.

DATE OF VISIT: 08/10/2025

Objectives of the Exposure Visit:

The main objectives of the exposure visit were:

- To introduce students to the concept of biotechnology incubation and startups.
- To understand the functioning of a pre-incubation and incubation centre.
- To expose students to modern laboratory infrastructure and research facilities.
- To encourage entrepreneurial thinking among students.
- To understand how biotechnology innovations are developed and commercialized.

Activities during the visit:

Orientation Session: Officials from the biotech park explained the role of the incubation centre and its contribution to the development of biotechnology startups.

Laboratory Tour: Students visited various laboratories and facilities within the incubation centre. They observed advanced equipment used for biotechnology research, product development, and testing.

Interaction with Experts: Students interacted with scientists, researchers, and entrepreneurs working in the park. They shared insights about research, innovation, and the challenges faced by startups.

Awareness on Startup Ecosystem: The students were introduced to the process of startup incubation, including idea generation, prototype development, funding support, and commercialization.

Learning Outcomes

The exposure visit helped students gain valuable knowledge and experience, such as:

- Understanding the importance of biotechnology innovation and entrepreneurship.
- Learning about startup incubation and research commercialization.
- Exposure to modern scientific instruments and laboratory infrastructure.
- Awareness about career opportunities in biotechnology and life sciences.

- Motivation to pursue research and innovation in their respective fields.

Conclusion

The exposure visit to the Pre-Incubation Centre at the Guwahati Biotech Park was highly informative and beneficial for the students. It provided practical insights into the biotechnology industry and the startup ecosystem. The visit encouraged students to think innovatively and explore opportunities in research, entrepreneurship, and technology development.

Overall, the visit was a valuable learning experience that bridged the gap between theoretical knowledge and real-world applications in biotechnology.
